Recalls

Recall # T79

Recall Date: 1/4/2018

BRAKE TRANSMISSION SHIFT INTERLOCK

Recall Description:

The Brake Transmission Shift Interlock (BTSI) locking pin may become stuck in the open position. A BTSI locking pin stuck in the open position may allow the transmission to be shifted out of PARK and to or from any gear position without depression of the brake pedal and/or without the key in the ignition, if a key is applicable.

Remedy

For 2013-2017 model year; inspect the Brake Transmission Shift Interlock (BTSI) operation and replace if necessary. The Body Control Module (BCM) software will also be updated. For 2009-2012 model year; replace the BTSI, BCM software update not applicable.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact RAM or visit Ram's website.

Recall # U61

Recall Date: 6/26/2018

REPROGRAM POWERTRAIN CONTROL MODULE

Recall Description:

The fault handling strategy of the Engine Control Module (ECM) or PCM software in the affected vehicles does not remove positive torque requests from the engine controller if the CAN-C bus stops communicating while the cruise control is requesting positive torque.

Remedy

Inspect the software level of the ECM/PCM and, if necessary, perform a software flash on the ECM/PCM of affected vehicles to improve the fault handling so that if the CAN-C bus does stop communicating any active torque requests will be cleared

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact RAM or visit Ram's website.
