Crane Issues

COMPLAINT:

- 1) Get crane operational for inspection
- 2) Crane inspection

CORRECTION:

A.S Aug 10/20 - Changed batteries in remote control but that did not work. I removed covers for the electronic solenoids and relays. I have 3.46V to the first relay. I have 3.46V at the master switch. I have 3.46V before the master switch. I followed the wire from there straight to the batteries. There is no visible sign of a corroded or frayed spot. I checked and cleaned all ground connections but that did not change anything. I used a 12V battery with booster cables and hooked up to the crane ground and switch. The crane works as it should. I pulled out the battery box and checked the positive connection there but it was OK. I noticed that there was a section of tape and a

large lump on the wire behind the battery box. I cut tape open and found corrosion and the other side of the splice fell off with the tape. I ran a new section of wiring, Hooked to battery and crane now works as it should. I put panels back on, Tied up wiring and slid battery box back in. Cleaned up area.
