CHANGE TIRE

COMPLAINT:

Need to change the spare tire to the factory one. Spare tire not coming down. going to try to get it to come down.

CORRECTION:

Changed the spare tire back to the factory one which was the front left one. Noticed the plastic lines for the 4 by 4 were broke. temporary fixed it. when i went to put the factory wheel back on i noticed that there was still mud on the inside of the rim. cleaned it out and informed Rick of the issue. Blow out the front right rime out as much as i could to get the mud build up out on it as the passenger was saying that there was a lot of vibration. went and looked at the rear tires and the right side had barely any thread left. went to go and get the factory tire that was for that truck and someone put a plug in it and it was flat. Put a spare on the rear right and notified Rick we need 2 new drive tires for this unit. Shawn dropped them off at the shop to get fixed. torqued the wheels to 150 FT / LB . Chase installed the wheels with the new tires on the truck.
