Blower & Headlight Issues

COMPLAINT:

The blower motor is not working

CORRECTION:

GW July 6.7/21

- 1) Diagnose and repair no blower motor operation. Remove necessary intake piping to access blower motor housing. Remove blower motor and check power feed and motor operation. Found faulty blower motor. Replace the blower motor with a used unit. Test operation, works as it should.
- 2) Diagnose and repair right headlamp out, new bulb already installed. Remove right headlamp bezel and wiring. 2.5 volts at lamp plugin, Trace harness back to the panel to try and find the source of low voltage and to repair wiring issue. Open and check harness in several locals, opening loom and checking for power along the source. Found the issue in the fuse panel box, replaced missing fuse (no correct panel map) Works as normal.
- 3) Replaced left low beam, found water in headlamp capsule. (sealed beam)
