Tracks need replaced

COMPLAINT:

Tracks need to be replaced. Both sides.

CORRECTION:

Got the skid steer to the mates at the laydown. We had a set of tracks here for that unit. the tracks then blow on 51-049 so we used the new tracks for 51-049 because there was one so so track on 51-049 and one so so on 51-052. both units tracks failed within 2 hours of each other in a cold snap that everything froze again. So get the unit blocked up and put heat on it to heat up the frozen mud. Got the track changed out and pumped up.

The new set of tracks were transferred from 51-052 to 51-049.

Ordered a new set of tracks and segments for 51-052. Tracks failed so time to change. Blocked up the skid steer and removed the failed tracks. Removed sprockets and cleaned up the matting surfaces. Installed the new sprockets and bolts .Pulled the idlers and cleaned out the mud from the seal area, removed the travel motor hose guard and cleaned and blew all the mud from around both sides. cleaned all the mud from the track frame, checked all the bottom rollers. Installed the new tracks and tightened them up. Ran the unit for a bit and retighten both tracks.
