started checking fittings one by one for tightness, a couple were a little loose, tightened them up and started to run machine, got 30/30 because of lightning and thunder, waiting for cenovus to lift the 30/30				
Aug14/24 SB = Got to machine, lifted cab, removed covers, followed lines to the we spots, cleaned with brake clean and air, ran it and checked where leaks were coming from, found one of the pilot lines leaking, removed and drove to town and had it made, drove back and installed, ran it for a few minutes no leaks immediately, operator says its still leaking, making sure it isn't residual oil, no more streams of oil were coming out of the machine when I had left, wiped down as much as I could reach and put all panels on

T.K. Aug 21/24 Lifted the cab of unit and removed the access panels and located a wet spot. Cleaned around area and had Rick run the unit while i watched for leaks. Couldn't locate the leak while cab was up. Found pinhole in hose going into the cab.					
T.K. Aug 22/24 Removed the hydraulic functions attached to the seat and removed the seat from the unit. Removed the covers for the RH joystick and removed the hose from the joystick. Lifted the cab and removed the hose from the valve. Tied a rope to the hose and pulled it through. Got fitting and made a new hose. Tied to the rope and pulled the hose through. Connected the hose and put clamps and ties back on. Put RH joystick covers back on. Put seat back into unit and mounted the hydraulic functions back onto the seat. Bolted down the seat ans installed the cab mount bolts. Ran unit and tested for leaks and no more leaks. Put panels back on and gresed entire unit. Unit is done.
