Hydraulic oil leak from under the cab

COMPLAINT:

Hydraulic oil leak from under the cab.

CORRECTION:

When to check out leak. Put spill pan and diapers under where the spill is. Had to lift up the cab to get access. Cleaned up the mess so we can start the machine and see where the leak is coming from. We need a hose. When and checked to see if we have a spare hose in the sea can. Nothing there. We went to another skid steer so we could run that one and the operator didn't think he needed to shovel his tracks. we couldn't even move the skid steer. Started to chip out the mud and then decided to just take the hose off this ice mud block and put it on the other skid steer. When and got hydraulic oil and topped up the oil. Ran and tested. All good. Moved the skid steer and cleaned up the rest of the mess.
