Fuel Gauge Issues

COMPLAINT:

Fuel gauge not working, keeps blowing fuses losing electronics

CORRECTION:

A.S Dec 17/18 - Noticed the fuel gauge was reading 1/2 full, I filled the tank and the gauge remained 1/2 full. I removed the level sensor from the tank and tested it with an ohm meter. It had good variable resistance while I moved it up and down. I hooked the wiring harness to it, Turned on the machine and the gauge moved properly while I was moving the float by hand. The float felt gritty while I was sliding it up and down the shaft. I cleaned up the float and installed back in the unit. Suspect it was stuck. Is good now.

Inspection

COMPLAINT:

Complete daily inspection sheet.

CORRECTION:

A.S Dec 17/18 - Inspected unit, Found the pins and bushings for the bucket tilt mount and tilt cylinders are getting worn, 3/16" play. Greased unit and filled out daily check sheet.
