 No Start/Hard Start

COMPLAINT:

The unit will not start, after sitting seems the fuel drains back to the tank and is hard to start.

CORRECTION:

A.S July 2/19 - Got unit started at the fence and pulled into the shop. When I went to prime the fuel pump it would not get hard to pump and I could hear a gurgling/bubbling noise coming from the primary fuel filter that is mounted on the rad. The line from the filter housing to the pump was rubbing on other lines and zip ties. I built a new hose and installed it on the unit. I pumped the hand primer and it got hard after only a few pumps. The unit still has a hard time starting after sitting for a few minutes. I pumped hand primer till it was hard and looked inside the fuel tank and found fuel leaking back into the tank from the return line. I removed the check valve from the fuel pump and there was leakage from the check ball.

Ordered new check valve.

A.S July 3/19 - Changed check valve, Started the truck and turned truck off. I pulled out hand primer and could barely push back into place. I will let the truck sit overnight in the shop and see how it starts in the morning.

A.S July 4/19 - Truck started good this morning, I wrapped hose I replaced in protective cover and tied it so it would
